Ian Lockwood

Front End Engineer

Skills

React	Ruby on Rails	UI/UX Design	HTML5
JavaScript/ES6+	Ruby	Responsive Design	CSS3
JQuery	SCSS/Sass	Photoshop	Git
	SQL	Sketch	

Profile

I love to build beautiful things. With my combined backgrounds in computer programming and the arts, I create applications that are not only functional, powerful, speedy and efficient, but also eye-catching, beautiful, and user-friendly.

Employment

Sundar, Inc. January 2017 – Current
Front End Engineer New York, NY

- Worked as the sole Front End Engineer
- Re-skinned the platform
- Created new features from back end to front
- Cleared the platform of various UI/UX issues
- Refined and polished the entire site

ShopVenture, Inc. March 2016 – December 2016
Front End Engineer New York, NY

- Worked as the sole Front End Engineer
- Created new features from back end to front
- Created and launched two full site redesigns
- Wrote animations in Javascript and JQuery
- Implemented various plug-ins, Ruby gems, and libraries

Education

Dev Bootcamp January 2016
Full Stack Development Bootcamp New York, NY

New York University B.F.A. Drama, 2015
Graduated with Honors New York, NY

Projects

React Pomodoro Timer

React.js • JavaScript/ES6 • HTML/CSS
A beautiful, functional, customizable Pomodoro Timer built in React. The timer uses conditional component rendering, is fully responsive, and can start, pause, and stop.

React Product Catalogue

React.js • JavaScript/ES6 • HTML/CSS
A basic catalogue where items can be sorted into different orders, filtered by category or attributes, or both.

React Editable-In-Place Blog

React.js • Ruby on Rails • HTML/SCSS
A React+RoR app that allows users to edit their blogs in place. The titles, slugs, and URL update in place, with no refresh.

ShopVenture Redesigns #1 & #2

Ruby on Rails • JS/JQuery • HTML/SCSS
A complete re-skin of the site, to take it from a funding-pitch site to a social user-focused site, and later a reorganization into responsive “tile” components.

Sundar Redesign

Ruby on Rails • JS/JQuery • HTML/SCSS
A clean up and re-styling of the entire Sundar platform. This project included a lot of UI clean up, tons of new scripting of UX, and some fun JavaScript animating.
